ABOUT ME

Results-driven Infrastructure & Operations Engineer with hands-on experience in 24/7 enterprise monitoring, incident management, and cloud infrastructure oversight at WaveMoney. Proficient in Linux system administration, Docker containerization, CI/CD automation, and multi-cloud environments (AWS & Azure). Passionate about automating deployment workflows, improving system reliability, and contributing as an Associate DevOps Engineer.

DATE OF BIRTH
7 / MAY / 2002

MARITALS STATUS
SINGLE

RELIGION
BUDDHA

TECHNICAL SKILLS

- Operating Systems & Scripting: Linux (Rocky Linux, Ubuntu, RHEL), Bash/Shell Scripting
- Cloud Platforms: AWS (EC2, S3 & CloudWatch), Azure Fundamentals
- Containers & Orchestration: Docker, Docker Compose, Kubernetes (Basic/RKE2)
- CI/CD & Version Control: Git, GitHub, GitLab CI/CD Pipelines
- Monitoring & Logging: Datadog, Zabbix, Grafana, AWS CloudWatch, Prometheus
- Automation & Tools: Terraform (Fundamentals), Ansible (Basic)
- Virtualization: VMware Administration

EXPERIENCE

May 2025 - Present
BIM Group of Companies

Senior NOC Engineer (WaveMoney HQ Site)

- Proactive Monitoring: Managed 24/7 real-time monitoring of system performance and network stability using industry-standard tools like Datadog and Zabbix to ensure high availability.
- Incident Management: Actively identified and responded to critical alerts, coordinating rapid incident resolution to minimize downtime and maintain seamless business operations.
- Cloud Health Oversight: Leveraged AWS CloudWatch to monitor cloud infrastructure resources and application health, ensuring optimal performance across cloud environments.
- Analysis & Reporting: Tracked detailed incident timelines and analyzed downtime logs to provide actionable insights for future troubleshooting and system improvements.
- Stakeholder Coordination: Professionalized external communications by managing timely email notifications to partners regarding planned maintenance and technical incidents
- Collaborated mostly with Wave Money SRE, DevOps & Database Engineers.

May 2024 - December 2024
NGO

IT Support

- Performed system deployments, including Windows OS installation, software configuration, and routine updates.
- Provided essential IT technical support to staff in the field and office environments.
- Diagnosed and resolved hardware, software, and basic networking issues.

CERTIFICATIONS

- **Linux Special Class (BNN Tech)**
- **Cloud Tech Fundamentals (VCE Training Centre)**
- **DevOps Bootcamp (MM Tech Academy)**
- **AWS Cloud Practitioner**
- **LFS162: DevOps and Site Reliability Engineering**
- **100 Days of DevOps (KodeKloud)**
- **100 Days of Cloud AWS (KodeKloud)**
- **100 Days of Cloud Azure (KodeKloud)**
- **EF-Set (English Certificate)**

LANGUAGES

- **Burmese (Native)**
- **English (C1 Advanced)**

EDUCATION

Government Technical Institute (G.T.I - Insein)

Diploma in Information Technology

Specialized - Web Design, HTML, CSS, JavaScript, Network Essentials, C++, C# & Data Communications

Dagon University

Bachelor in Mathematics (B.Sc - Maths)

Specialized - Applied Mathematics
